Abstract

Lorem ipsum blah blah blah

1 Introduction

The following instructions are directed to authors of papers submitted to ACL-2014 or accepted for publication in its proceedings. All authors are required to adhere to these specifications. Authors are required to provide a Portable Document Format (PDF) version of their papers. **The proceedings are designed for printing on A4 paper.**

2 System Overview

Um, it's a summarization system.

Text goes in, summarization comes out.

3 Approach

We strongly prefer that you prepare your PDF files using L^AT_EX with the official ACL 2014 style file (acl2014.sty) and bibliography style (acl.bst). These files are available at <http://www.cs.jhu.edu/ACL2014/>. You will also find the document you are currently reading (acl2014.pdf) and its L^AT_EX source code (acl2014.tex) on this website.

4 Results

ROUGE and words

5 Discussion

Headings: Type and label section and subsection headings in the style shown on the present document. Use numbered sections (Arabic numerals) in order to facilitate cross references. Number subsections with the section number and the subsection number separated by a dot, in Arabic numerals. Do not number subsections.

6 Conclusion

Footnotes: Put footnotes at the bottom of the page and use 9 points text. They may be numbered or referred to by asterisks or other symbols.¹ Footnotes should be separated from the text by a line.²

¹This is how a footnote should appear.

²Note the line separating the footnotes from the text.
